

CONTENTS

CHAPTER 1 - INTRODUCTION TO GREEN COMPUTING	1-17
1.1 Introduction	
1.2 Need for Green Computing	
1.3 Environmental Impact of Information Technology	
1.4 Principles of Green Computing	
1.5 Benefits of Green Computing	
CHAPTER 2 - ENVIRONMENTAL IMPACT OF COMPUTING	18-34
2.1 Introduction	
2.2 Carbon Footprint of Computing Systems	
2.3 Energy Consumption in Computing Systems	
2.4 Electronic Waste (E-Waste)	
2.5 Strategies to Reduce Environmental Impact of Computing	
CHAPTER 3 - ENERGY-EFFICIENT HARDWARE DESIGN	35-51
3.1 Principles of Energy-Efficient Hardware Design	
3.2 Low-Power Processors and Memory	
3.3 Energy-Efficient Processor Architectures	
3.4 Energy-Efficient Storage Technologies	
3.5 Energy-Efficient Networking Hardware	
CHAPTER 4 - ENERGY MANAGEMENT IN COMPUTING SYSTEMS	52-68
4.1 Fundamentals of Energy Management in Computing	
4.2 Energy Consumption Models in Computing Systems	
4.3 Virtualization and Server Consolidation for Energy Efficiency	
4.4 Energy-Aware Scheduling and Resource Allocation	
4.5 Cooling Technologies and Thermal Management in Computing Systems	
CHAPTER 5 - GREEN DATA CENTERS	69-83
5.1 Concept of Green Data Centers	
5.2 Architecture of Green Data Centers	
5.3 Energy Consumption in Data Centers	
5.4 Power Usage Effectiveness (PUE)	
5.5 Renewable Energy Integration in Green Data Centers	

CHAPTER 6 - GREEN CLOUD COMPUTING	84-99
6.1 Concept of Green Cloud Computing	
6.2 Cloud Computing Architecture	
6.3 Energy-Aware Resource Allocation	
6.4 Green Cloud Architecture	
6.5 Future Trends in Sustainable Cloud Computing	
CHAPTER 7 - SUSTAINABLE NETWORKING	100-115
7.1 Introduction	
7.2 Green Routing Protocols	
7.3 Energy-Efficient Network Hardware	
7.4 Software-Defined Networking for Sustainability	
7.5 Future Directions in Sustainable Networking	
CHAPTER 8 - GREEN SOFTWARE ENGINEERING	116-136
8.1 Introduction	
8.2 Energy-Efficient Software Design	
8.3 Energy-Aware Programming and Optimization Techniques	
8.4 Green Software Development Lifecycle	
8.5 Tools, Frameworks, and Best Practices for Green Software Engineering	
CHAPTER 9 - INTERNET OF THINGS AND SUSTAINABLE SYSTEMS	137-152
9.1 Introduction	
9.2 Architecture of IoT-Based Sustainable Systems	
9.3 IoT Applications in Sustainable Systems	
9.4 Energy Efficiency and Sustainability in IoT Systems	
9.5 Challenges, Security, and Future Trends in IoT-Based Sustainable Systems	
CHAPTER 10 - E-WASTE MANAGEMENT	153-171
10.1 Introduction	
10.2 Sources and Types of E-Waste	
10.3 Environmental and Health Impacts of E-Waste	
10.4 E-Waste Recycling and Recovery Technologies	
10.5 Policies and Regulations for E-Waste Management	
CHAPTER 11 - SUSTAINABILITY METRICS AND POLICIES	172-182
11.1 Introduction	
11.2 Environmental Sustainability Metrics in Computing	

- 11.3 Social and Economic Sustainability Metrics**
- 11.4 Sustainability Policies and Frameworks**
- 11.5 Measuring and Reporting Sustainability Performance**

CHAPTER 12 - FUTURE TRENDS IN SUSTAINABLE COMPUTING **183-191**

- 12.1 Introduction**
- 12.2 Artificial Intelligence for Energy Optimization**
- 12.3 Renewable Energy Integration in Computing Infrastructure**
