

TABLE OF CONTENTS

Unit No.	Title	Page No.
1	Introduction to Robotics & Automation 1.1 Definition and scope of robotics 1.2 Industrial vs service robots 1.3 Applications in electrical, manufacturing, power systems 1.4 Classification of Robots 1.5 Components of a Robotic System 1.6 Degrees of Freedom (DOF) 1.7 Types of Automation 1.8 Sensors and Actuators	01-35
2	Mathematical Preliminaries 2.1 Vectors and matrices 2.2 Coordinate frames 2.3 Rotation matrices 2.4 Homogeneous transformation matrices	36-51
3	Robot Kinematics - Forward Kinematics 3.1 Degrees of freedom (DOF) 3.2 Link and joint representation 3.3 Denavit-Hartenberg (D-H) parameters 3.4 Forward kinematics of serial manipulators	52-63
4	Robot Kinematics - Inverse Kinematics 4.1 Analytical and numerical methods 4.2 Multiple solutions and workspace analysis 4.3 Redundancy and constraints	64-76
5	Velocity Kinematics & Jacobian 5.1 Linear and angular velocities 5.2 Jacobian matrix derivation 5.3 Singularities and manipulability 5.4 Static force analysis	77-88
6	Robot Dynamics 6.1 Newton-Euler formulation 6.2 Lagrangian dynamics 6.3 Equations of motion 6.4 Dynamic modeling of manipulators	89-100

7	Trajectory Planning 7.1 Joint space vs Cartesian space trajectories 7.2 Polynomial trajectory planning 7.3 Velocity and acceleration constraints 7.4 Smooth motion generation	101-112
8	Control of Robotic Systems 8.1 Open-loop and closed-loop control 8.2 PID control for robot joints 8.3 Computed torque control 8.4 Introduction to nonlinear control	113-124
9	Actuators & Drive Systems 9.1 DC, AC and stepper motors 9.2 Servo motors and drives 9.3 Power electronics for robot actuation 9.4 Selection of actuators	125-142
10	Sensors & Feedback Systems 10.1 Position, velocity, and force sensors 10.2 Encoders and resolvers 10.3 Proximity and vision sensors 10.4 Sensor integration and signal conditioning	143-158
11	Industrial Automation & PLC 11.1 Automation strategies (fixed, programmable, flexible) 11.2 PLC architecture and programming 11.3 SCADA and industrial communication 11.4 Robotic automation in industries	159-173
12	Mobile Robotics & Intelligent Automation 12.1 Mobile robot kinematics 12.2 Navigation and path planning 12.3 Introduction to ROS 12.4 AI and machine learning basics in robotics	174-189
