TABLE OF CONTENTS

Chapter No.	Title	Page No.
1	**Foundations of Language Intelligence in Finance**	**1-10**
	1.1 Introduction to Financial Language Systems 1.2 Evolution of NLP in Financial Technology 1.3 Use Cases Across Financial Domains 1.4 Benefits and Limitations of Language Models in Finance	
2	**Natural Language Processing in Financial Domains**	**11-27**
	2.1 Text Preprocessing and Tokenization 2.2 Named Entity Recognition for Financial Terms 2.3 Sentiment Analysis and Topic Modelling 2.4 Text Classification and Information Extraction	
3	**From Word Embeddings to Transformers**	**28-38**
	3.1 Overview of Word2Vec, glove, and fasttext 3.2 Recurrent Architectures (RNN, LSTM, GRU) 3.3 Transformer Model Design and Attention Mechanisms 3.4 Key Models: BERT, GPT, T5, and their Financial Variants	
4	**Fine-Tuning Language Models for Finance**	**39-53**
	4.1 Domain-Specific Pretraining and Fine-Tuning 4.2 Data Collection and Labeling for Financial Corpora 4.3 Case Studies: Finbert, Bloomberggpt, Financialt5 4.4 Evaluation Techniques for Fine-Tuned Models	
5	**Prompt Engineering and In-Context Learning**	**54-69**
	5.1 Designing Effective Prompts for Financial Tasks 5.2 Chain-of-Thought, Zero/Few-Shot Prompting 5.3 System vs User Prompting in Banking Use Cases 5.4 Prompt Evaluation and Iteration Strategies	
6	**Retrieval-Augmented Generation (RAG) in Finance**	**70-85**
	6.1 RAG Architecture Overview 6.2 Integrating Vector Databases (e.g., FAISS, Pinecone) 6.3 Use Cases in Document Q&A and Search	

	6.4 Combining RAG with LLMs in Regulatory Environments	
7	**Financial Document Understanding with LLMS**	**86-101**
	7.1 Extracting Entities and Relationships from 10-Ks 7.2 Understanding and Summarizing Earnings Reports 7.3 Table Extraction and Layout-Aware Models 7.4 Automating Regulatory Filings Analysis	
8	**Conversational AI in Banking and Investment**	**102-115**
	8.1 Designing LLM-Based Virtual Financial Assistants 8.2 Automating KYC and Onboarding Workflows 8.3 Real-Time Banking Bots and Voice Interfaces 8.4 Personalization and Feedback Loops	
9	**AI for Compliance, Regulation, and Legal Intelligence**	**116-127**
	9.1 Regulatory Intelligence Using LLMs 9.2 Clause Extraction from Financial Contracts 9.3 AML and KYC Risk Scoring with Language Models 9.4 Use Cases in Basel III, Dodd-Frank, and GDPR	
10	**LLMS in Fraud Detection and Risk Analysis**	**128-140**
	10.1 Text-Based Anomaly Detection 10.2 Suspicious Activity Report (SAR) Summarization 10.3 Hybrid Systems: LLMs and Graph-Based Models 10.4 NLP in Real-Time Risk Monitoring	
11	**Sentiment and Trend Analysis for Investment Decisions**	**141-153**
	11.1 Mining Market Sentiment from News and Social Media 11.2 ESG Scoring Using Natural Language Processing 11.3 Trend Detection in Analyst Reports 11.4 LLMs for Portfolio Insights and Robo-Advising	
12	**Secure Deployment of LLMS in Financial Infrastructure**	**154-164**
	12.1 Deployment Models: API, On-Prem, Hybrid 12.2 Model Optimization for Low Latency 12.3 Containerization and MLOps for LLMs 12.4 Integration with Core Financial Systems	

13	**Security, Privacy, and Ethics of Financial LLMS**	**165-176**
	13.1 Handling Sensitive Data and Compliance Constraints 13.2 Preventing Prompt Injection and Model Hallucination 13.3 Ensuring Model Explainability and Auditability 13.4 Bias, Fairness, and Ethical Implications	
14	**Evaluating Language Models in Financial Contexts**	**177-188**
	14.1 Performance Metrics: BLEU, ROUGE, F1 14.2 Domain-Specific Evaluation Techniques 14.3 Financial Truthfulness and Hallucination Rates 14.4 Benchmark Datasets and Leaderboards	
15	**Multimodal and Agent-Based Financial Intelligence**	**189-201**
	15.1 Merging Text, Tables, and Charts with Multimodal llms 15.2 LLM Agents for Workflow Automation 15.3 Financial Digital Twins and Simulation Environments 15.4 Coordination Between Agents for Financial Tasks	
16	**Generative Finance and Autonomous Systems**	**202-214**
	16.1 Using LLMs for Synthetic Data Generation 16.2 Automated Report and Statement Generation 16.3 Self-Improving LLMs for Financial Planning 16.4 LLMs in Autonomous Finance and Strategy Design
