

TABLE OF CONTENTS

Module no.	Title	Page no.
1	INTRODUCTION TO DIGITAL COMMUNICATION	1-25
	1.1 Elements of a Digital Communication System	
	1.2 Communication Channels and Their Characteristics	
	1.3 Mathematical Models for Communication Channels	
	1.4 Performance Metrics: SNR, Bit Error Rate (BER), Symbol Error Rate (SER)	
	1.5 Overview of Source Coding, Channel Coding, and Modulation	
	1.6 Historical Perspective and Modern Applications	
2	SOURCE CODING	26-42
	2.1 Information Theory Fundamentals: Entropy, Information Rate	
	2.2 Source Coding Theorem	
	2.3 Lossless Source Coding: Huffman Coding, Lempel-Ziv Algorithms (LZ77, LZ78)	
	2.4 Lossy Source Coding: Quantization (Scalar and Vector), Differential Encoding (DPCM)	
	2.5 Applications of Source Coding (e.g., Audio and Image Compression)	
3	CHANNEL CODING	43-64
	3.1 Introduction to Error Control Coding	
	3.2 Linear Block Codes: Generator and Parity-Check Matrices, Syndrome Decoding	
	3.3 Cyclic Codes: Encoding and Decoding	
	3.4 Convolutional Codes: Encoding, Viterbi Decoding	
	3.5 Performance Analysis of Channel Codes	
	3.6 Turbo Codes and LDPC Codes (Introduction)	
4	DIGITAL MODULATION TECHNIQUES	65-83
	4.1 Amplitude Shift Keying (ASK): OOK, BPSK	
	4.2 Frequency Shift Keying (FSK): Coherent and Non-Coherent Detection	
	4.3 Phase Shift Keying (PSK): BPSK, QPSK, M-PSK	
	4.4 Quadrature Amplitude Modulation (QAM): M-QAM	

	4.5 Signal Space Representation and Constellation Diagrams 4.6 Power Spectral Density of Digital Modulated Signals 4.7 Minimum Shift Keying (MSK) and Gaussian Minimum Shift Keying (GMSK)	
5	SIGNAL RECEPTION AND EQUALIZATION 5.1 Optimum Receiver for AWGN Channel 5.2 Matched Filter Receiver 5.3 Correlator Receiver 5.4 Channel Impairments: ISI, Fading 5.5 Equalization Techniques: Zero-Forcing Equalizer, Minimum Mean Square Error (MMSE) Equalizer 5.6 Adaptive Equalization	84-108
6	MULTIPLE ACCESS TECHNIQUES 6.1 Frequency Division Multiple Access (FDMA) 6.2 Time Division Multiple Access (TDMA) 6.3 Code Division Multiple Access (CDMA): Spread Spectrum Techniques, PN Sequences 6.4 Orthogonal Frequency Division Multiplexing (OFDM) as a Multiple Access Scheme 6.5 Space Division Multiple Access (SDMA)	109-131
