

TABLE OF CONTENTS

Chapter No.	Title	Page No.
1	Introduction to Electron Devices and Modern Electronics	1-15
	1.1 History 1.2 Types of Electronic Devices 1.3 Analog vs Digital 1.4 Overview Electronic System	
2	Semiconductor Physics	16-37
	2.1 Energy Bands of Semiconductor 2.2 Carrier Transport of Semiconductor 2.3 Intrinsic/Extrinsic Semiconductor 2.4 PN Junction Theory	
3	Diodes and Applications	38-83
	3.1 Zener diode 3.2 Schottky diode 3.3 Photodiode 3.4 LED 3.5 Rectifiers 3.6 Regulators 3.7 Clippers/clampers	
4	Bipolar Junction Transistors (BJTs)	84-101
	4.1 CE, CB, CC configurations of BJT 4.2 Biasing of BJT 4.3 Switching of the BJT	
5	Field Effect Transistors (FETs and MOSFETs)	102-112
	5.1 JFET 5.3 MOSFET	
6	Amplifiers	113-133
	6.1 Types (Class A, B, AB, C) of Amplifiers 6.2 Multistage Amplifier 6.3 Coupling of amplifiers 6.4 Frequency Response of Amplifiers	
7	Oscillators and Waveform Generators	134-152
	7.1 RC OSCILLATOR 7.2 LC OSCILLATOR 7.3 Oscillator 7.4 Relaxation Oscillators 7.5 Stability Criteria	

8	Feedback and Power Amplifiers	153-168
	8.1 Feedback Types 8.2 Emitter Follower 8.3 Power Amplifier Classification 8.4 Distortion and Efficiency	
9	Operational Amplifiers and Applications	169-183
	9.1 Inverting and Non-Inverting Amplifiers 9.2 Integrator 9.3 Differentiator	
10	Digital Logic and Circuits	184-222
	10.1 Logic Gates 10.2 Boolean laws 10.3 K-map 10.4 Encoder and Decoder 10.5 Flip-Flop 10.6 Counter 10.7 Multiplexer	
11	Circuit Design and Simulation Tools	223-232
	11.1 SPICE 11.2 Proteus 11.3 Multisim 11.4 Circuit Debugging 11.5 PCB Basics	
12	IC Fabrication and MEMS Basics	233-244
	12.1 Photolithography 12.2 IC Fabrication Process 12.3 Doping 12.4 Intro to MEMS/NEMS	
13	Societal Applications of Electronic Devices	245-254
	13.1 Electronics for Environment 13.2 Electronics for Energy 13.3 Electronics for Healthcare 13.4 Electronics for Agriculture 13.5 Electronics for Disaster Resilience
