

TABLE OF CONTENTS

Chapter No.	Title	Page No.
1	History and Scope of Microbiology	01-23
	1.1 History and Scope of Microbiology 1.2 Spontaneous Generation and Biogenesis Theory 1.3 Contributions of Major Pioneers 1.3.1 Antonie Van Leeuwenhoek 1.3.2 Louis Pasteur 1.3.3 Robert Koch 1.3.4 Edward Jenner 1.3.5 Paul Ehrlich 1.3.6 Alexander Fleming	
2	Microscopy and Staining Techniques	24-49
	2.1 Principles and Applications of Microscopes 2.1.1 Simple and Compound Microscope 2.1.2 Dark Field Microscope 2.1.3 Phase Contrast Microscope 2.1.4 Fluorescent Microscope 2.1.5 Scanning Electron Microscope (SEM) 2.1.6 Transmission Electron Microscope (TEM) 2.2 Types of Staining Techniques 2.2.1 Simple Staining 2.2.2 Differential Staining 2.2.3 Special Stains 2.3 Lactophenol Cotton Blue (LPCB) Mount 2.4 Potassium Hydroxide (KOH) Mount	
3	Bacterial Cell Structure	50-68
	3.1 Ultra Structure of Bacteria 3.2 Components of Bacterial Cells 3.2.1 Cell Envelope 3.2.2 Cell Wall (Gram-Positive and Gram-Negative Differences) 3.2.3 Slime Layer 3.2.4 Capsule 3.2.5 Flagella 3.2.6 Pili	

4	Sterilization, Disinfection and Culture Preservation	69-89
	4.1 Principles and Methods of Sterilization 4.1.1 Physical Methods of Sterilization 4.1.2 Chemical Sterilization 4.2 Preservation and Maintenance of Microbial Cultures	
5	Culture Methods and Media Preparation	90-109
	5.1 Culture Media Preparation 5.2 Solid and Liquid Media 5.3 Types of Media 5.4 Pure Culture Techniques 5.5 Anaerobic Cultivation of Bacteria
