TABLE OF CONTENTS

Chapter No.	Title Foundations of Artificial Intelligence and Big Data	
1	Foundations of Artificial Intelligence and Big Data	01-33
	 1.1 Introduction to Artificial Intelligence and Big Data 1.2 Historical Evolution and Milestones 1.3 Core Concepts of Artificial Intelligence 1.4 Fundamentals of Big Data 1.5 Types of AI and Machine Learning Approaches 1.6 Data Lifecycle and Data-Driven Culture 1.7 Importance of AI and Big Data in Digital Business 1.8 Challenges in Traditional Data Processing 1.9 Comparative Analysis: AI vs Traditional BI 1.10 Overview of Real-World Business Use Cases 	
2	Tools, Technologies, and Infrastructure	34-65
	 2.1 Overview of Big Data Architecture 2.2 Apache Hadoop Ecosystem 2.3 Introduction to Apache Spark and Streaming 2.4 NoSQL Databases and Data Storage Options 2.5 AI Development Environments and Libraries 2.6 Data Integration and ETL Tools 2.7 Cloud Platforms for AI and Big Data 2.8 Visualization and BI Tools 2.9 Programming Languages and APIs 2.10 Data Governance and Security Infrastructure 	
3	AI and Big Data Applications in Business	66-94
	 3.1 Customer Segmentation and Personalization 3.2 Sales Forecasting and Demand Prediction 3.3 Fraud Detection and Financial Risk Analytics 3.4 Recommendation Engines 3.5 Natural Language Processing in Customer Service 3.6 Computer Vision in Retail and Manufacturing 3.7 Operational Optimization and Process Automation 3.8 Social Media Analytics and Brand Monitoring 3.9 Healthcare and Medical Diagnostics 3.10 Cross-Industry Use Cases and Success Stories 	

4	Strate	egic Integration and Business Transformation	95-119	
	4.1	AI and Big Data in Digital Transformation Strategy		
	4.2	Developing a Data-Driven Business Model		
	4.3	Infrastructure and Technology Planning		
	4.4	Organizational Readiness and Cultural Shifts		
	4.5	AI Talent, Roles, and Team Structure		
	4.6	Key Performance Indicators (KPIs) and ROI Metrics		
	4.7	AI Product Lifecycle and Project Management		
	4.8	Scalability, Automation, and Maintenance		
	4.9	Partnering with Vendors and Startups		
	4.10	Overcoming Challenges in AI Adoption		
		Governance, Ethics, and Future Trends		
5	Gove	rnance, Ethics, and Future Trends	120-148	
5	Gove 5.1	Prnance, Ethics, and Future Trends Data Privacy and Regulatory Compliance	120-148	
5	5.1		120-148	
5	5.1 5.2	Data Privacy and Regulatory Compliance	120-148	
5	5.1 5.2 5.3	Data Privacy and Regulatory Compliance Ethical Considerations in AI and Big Data	120-148	
5	5.1 5.2 5.3	Data Privacy and Regulatory Compliance Ethical Considerations in AI and Big Data Explainable AI (XAI) and Transparency	120-148	
5	5.1 5.2 5.3 5.4	Data Privacy and Regulatory Compliance Ethical Considerations in AI and Big Data Explainable AI (XAI) and Transparency Cybersecurity and Data Protection	120-148	
5	5.1 5.2 5.3 5.4 5.5	Data Privacy and Regulatory Compliance Ethical Considerations in AI and Big Data Explainable AI (XAI) and Transparency Cybersecurity and Data Protection Bias Mitigation and Responsible AI Development	120-148	
5	5.1 5.2 5.3 5.4 5.5 5.6 5.7	Data Privacy and Regulatory Compliance Ethical Considerations in AI and Big Data Explainable AI (XAI) and Transparency Cybersecurity and Data Protection Bias Mitigation and Responsible AI Development Sustainability and Environmental Impacts of AI	120-148	
5	5.1 5.2 5.3 5.4 5.5 5.6 5.7	Data Privacy and Regulatory Compliance Ethical Considerations in AI and Big Data Explainable AI (XAI) and Transparency Cybersecurity and Data Protection Bias Mitigation and Responsible AI Development Sustainability and Environmental Impacts of AI Generative AI and Its Business Potential	120-148
