

TABLE OF CONTENTS

Chapter No.	Title	Page No.
1	Basic Understanding	01-19
	1.1 What is Civil Engineering/Infrastructure? 1.2 Basic of Engineering and Civil Engineering 1.3 Broad Disciplines of Civil Engineering 1.4 Importance of Civil Engineering	
2	History of Civil Engineering	20-39
	2.1 Early Constructions and Development Overtime 2.2 Ancient Monuments & Modern Marvels 2.3 Development of Various Materials of Construction and Methods of Construction 2.4 Works of Eminent Civil Engineers	
3	Overview of National Planning for Construction and Infrastructure Development	40-59
	3.1 Position of Construction Industry Vis-as-vis other industries 3.2 Five Year Plan Outlays for Construction 3.3 Current Budgets for Infrastructure Works	
4	Fundamentals of Architecture & Town Planning	60-83
	4.1 Aesthetics in Civil Engineering 4.2 Example of Great Architecture 4.3 Fundamentals of Architectural Design & Town Planning 4.4 Building Systems (HVAC, Acoustics, Lighting, etc.,) 4.5 LEED ratings 4.6 Development of Smart Cities	
5	Fundamentals of Building Materials	84-103
	5.1 Stones, Bricks, Mortars, Plain, Reinforces & Prestressed Concrete 5.2 Construction Chemicals, Structural Steel, High Tensile Steel, Carbon Composites 5.3 Plastics in Construction 5.4 3D Printing 5.5 Recycling of Construction & Demolition Wastes	

6	Basic of Construction Management & Contracts Management	104-124
	6.1 Temporary Structures in Construction 6.2 Construction Methods for Various Types of Structures 6.3 Major Construction Equipment 6.4 Automation & Robotics in Construction 6.5 Modern Projects Management Systems 6.6 Advent of Lean Construction 6.7 Importance of Contracts Management	
7	Environmental Engineering & Sustainability	125-146
	7.1 Water Treatment Systems 7.2 Effluent Treatment Systems 7.3 Solid Waste Management 7.4 Sustainability in Construction	
8	Geotechnical Engineering	147-166
	8.1 Basics of Soils Mechanics 8.2 Rock Mechanics and Geology 8.3 Various Types of Foundations 8.4 Basics of Rock Mechanics & Tunnelling	
9	Hydraulics, Hydrology & Water Resources Engineering	167-184
	9.1 Fundamentals of Fluid Flow 9.2 Basic pf Water Supply Systems 9.3 Underground Structure 9.4 Underground Structures Multi-Purpose Reservoir Projects	
10	Ocean Engineering	185-202
	10.1 Basics of Wave and Current Systems 10.2 Sediment Transport Systems 10.3 Ports & Harbours and Other Marine Structures
