TABLE OF CONTENTS

Chapter No.	Title	Page No.
1	**Concrete Materials & Fundamentals**	01-30
	1.1 Concrete as Composite Material 1.2 Microstructure of Concrete 1.3 Types of Cement 1.4 Hydration of Cement 1.5 Bogue's Compounds 1.6 Aggregates-Types Grading and Properties 1.7 Chemical & Mineral Admixtures 1.8 Concrete as Composite Material 1.9 Microstructure of Concrete 1.10 Types of Cement 1.11 Hydration of Cement; Bogue's Compounds; Aggregates—Types	
2	**Fresh and Hardened Concrete Properties**	31-56
	2.1 Workability and Tests 2.2 Segregation and Bleeding 2.3 Mixing, Placing, Compaction and Curing 2.4 Strength Characteristics 2.5 Stress–Strain Behavior 2.6 Elastic Properties 2.7 Creep and Shrinkage	
3	**Durability & Quality Control**	57-80
	3.1 Durability Concepts 3.2 Permeability 3.3 Chemical Attack 3.4 Corrosion of Reinforcement 3.5 Fire and Freeze–Thaw Resistance 3.6 Quality Control Methods 3.7 Non-Destructive testing	
4	**Concrete Mix Design & Special Concretes**	81-105
	4.1 Mix Design Principles 4.2 IS 10262 Method 4.3 ACI and BS Methods	

	4.4 High-Strength Concrete 4.5 High-Performance Concrete 4.6 Self-Compacting Concrete 4.7 Lightweight and Heavyweight Concrete	
5	**Advanced & Fiber-Reinforced Concretes**	**106-133**
	5.1 Fiber-Reinforced Concrete 5.2 Types and Properties of Fiber-Reinforced Concrete 5.3 Polymer CONCRETE 5.4 Geopolymer Concrete 5.5 Mass Concrete 5.6 Shotcrete 5.7 Ferrocement	
6	**Applications & Sustainable Concrete**	**134-153**
	6.1 Concrete in Bridges, Pavements and High-Rise Buildings 6.2 Marine and Hydraulic Structures 6.3 Green Concrete 6.4 Recycling of Concrete 6.5 Nanotechnology in Concrete; 6.6 Future Trends
