

TABLE OF CONTENTS

Chapter 1: Foundations of Site Reliability Engineering (SRE)	01-21
1.1 Evolution of Site Reliability Engineering: The Google Model	
1.2 SRE vs DevOps vs Traditional IT Operations	
1.3 Reliability as a Core System Requirement	
1.4 Key Performance Metrics: Availability, Latency, and Throughput	
1.5 SRE in Critical Infrastructure Systems	
1.6 Toil Reduction and Automation Principles	
1.7 SRE Organizational Structures and Models	
Chapter 2: Reliability Metrics and Service Commitments	22-40
2.1 Service Level Indicators (SLIs)	
2.2 Service Level Objectives (SLOs)	
2.3 Service Level Agreements (SLAs)	
2.4 Error Budgets and Their Strategic Importance	
2.5 Reliability Measurement Techniques	
2.6 Monitoring Key Performance Indicators (KPIs)	
2.7 Balancing Reliability and Innovation	
Chapter 3: Cloud and Distributed Systems Reliability	41-62
3.1 Cloud Service Models: IaaS, PaaS, and SaaS	
3.2 Fundamentals of Distributed Systems Architecture	
3.3 Designing for High Availability	
3.4 Load Balancing and Auto-Scaling Strategies	
3.5 Infrastructure as Code (IaC)	
3.6 Multi-Cloud Reliability Strategies	
3.7 Data Center Reliability and Resilience	
Chapter 4: Observability and Monitoring Systems	63-82
4.1 Observability vs Monitoring: Concepts and Differences	
4.2 Core Telemetry: Metrics, Logs, and Traces	

- 4.3 Monitoring Tools: Prometheus, Grafana, and ELK Stack
- 4.4 Alerting Strategies and Noise Reduction
- 4.5 Real-Time Monitoring Systems
- 4.6 Root Cause Analysis Techniques
- 4.7 Distributed Tracing in Microservices

Chapter 5: Incident Management and Resilience **83-102**

- 5.1 Incident Lifecycle Management
- 5.2 On-Call Engineering Practices
- 5.3 Runbooks and Playbooks
- 5.4 Blameless Postmortems and Learning Culture
- 5.5 Disaster Recovery Planning
- 5.6 Chaos Engineering Principles
- 5.7 Business Continuity Planning

Chapter 6: Automation and CI/CD Pipelines **103-121**

- 6.1 Toil Identification and Automation
- 6.2 Continuous Integration and Continuous Deployment (CI/CD)
- 6.3 Deployment Strategies: Blue-Green, Canary, and Rolling
- 6.4 Container Orchestration with Kubernetes
- 6.5 Infrastructure Provisioning with Terraform
- 6.6 Configuration Management Tools
- 6.7 Continuous Testing and DevSecOps Integration

Chapter 7: Security and Compliance in SRE **122-143**

- 7.1 Security Principles in Site Reliability Engineering
- 7.2 Regulatory Compliance and Standards
- 7.3 Data Privacy and Protection Mechanisms
- 7.4 Zero Trust Architecture
- 7.5 Risk Assessment and Management
- 7.6 Secure System Design
- 7.7 Cybersecurity Integration in SRE Practices

Chapter 8: The Future of Site Reliability Engineering

144-164

- 8.1 Artificial Intelligence for IT Operations (AIOps)
- 8.2 Autonomous Systems in Infrastructure Management
- 8.3 AI-Based Failure Prediction
- 8.4 Self-Healing Systems and Automation
- 8.5 Edge Computing and Reliability Challenges
- 8.6 Quantum Computing: Emerging Reliability Considerations
- 8.7 Strategic Roadmap for Next-Generation SRE
