

TABLE OF CONTENTS

Unit No.	Title	Page No.
1	Foundations of Identity & Access Management 1.1 Introduction to IAM in modern enterprises 1.2 Identity lifecycle management (Joiner-Mover-Leaver model) 1.3 Authentication vs Authorization 1.4 Digital identity types (human, machine, service identities) 1.5 IAM in zero trust architecture 1.6 IAM standards overview (SAML, OAuth 2.0, OpenID Connect) 1.7 IAM Threats, Attacks, and Security Challenges 1.8 IAM Best Practices and Design Principles	01-30
2	Authentication Systems & Protocols 2.1 Password-based authentication and limitations 2.2 Multi-Factor Authentication (MFA) systems 2.3 Adaptive / risk-based authentication 2.4 Federated identity systems 2.5 Single Sign-On (SSO) architecture 2.6 Passwordless Authentication Systems	31-51
3	Authorization Models & Access Control 3.1 Access control fundamentals 3.2 Discretionary Access Control (DAC) 3.3 Mandatory Access Control (MAC) 3.4 Role-Based Access Control (RBAC) 3.5 Attribute-Based Access Control (ABAC) 3.6 Policy-Based Access Control (PBAC)	52-67
4	IAM Architecture & Enterprise Design 4.1 IAM architecture layers (identity, policy, enforcement) 4.2 Directory services (LDAP, Active Directory) 4.3 Identity federation across organizations 4.4 Cloud IAM architecture (AWS IAM, Azure AD, GCP IAM) 4.5 Microservices IAM challenges	68-83

5	Cryptography & Secure Identity Systems 5.1 Hashing and password storage (bcrypt, Argon2) 5.2 Public Key Infrastructure (PKI) 5.3 Digital certificates and trust chains 5.4 Token-based authentication 5.5 Secure key management systems (KMS, HSM)	84-95
6	Identity Governance & Administration (IGA) 6.1 Identity governance framework 6.2 Access certification and audit workflows 6.3 Privileged Access Management (PAM) 6.4 SoD (Separation of Duties) enforcement 6.5 Role mining and role engineering	96-109
7	IAM in Cloud & Distributed Systems 7.1 Cloud-native IAM architecture 7.2 IAM in serverless systems 7.3 Container identity (Kubernetes RBAC) 7.4 Workload identity federation 7.5 API gateways and identity propagation 7.6 Identity in DevSecOps pipelines	110-125
8	Advanced Topics & Future Trends 8.1 Passwordless authentication (FIDO2, WebAuthn) 8.2 Decentralized identity (DID, blockchain identity systems) 8.3 AI-driven identity risk scoring 8.4 Behavioral biometrics 8.5 Continuous authentication systems	126-140
