

TABLE OF CONTENTS

Chapter 1: Introduction to Supply Chain Systems	01-17
1.1 Supply Chain Fundamentals	
1.2 Role of Supply Chains in Food, Retail, and Financial Sectors	
1.3 Challenges in Modern Supply Chains	
1.4 Digital Transformation of Supply Chain	
Chapter 2: Enterprise Resource Planning (ERP) Overview	18-37
2.1 Evolution of ERP Systems	
2.2 Core Concepts of ERP	
2.3 Introduction to SAP ERP	
2.4 Key SAP Modules: MM, SD, PP, FI	
2.5 ERP in a Digital Economy	
Chapter 3: SAP ERP and SAP S/4HANA Architecture	38-58
3.1 SAP System Landscape (DEV, QA, PROD)	
3.2 Overview of SAP S/4HANA	
3.3 SAP Fiori User Experience	
3.4 Data Models and Simplification	
3.5 Cloud vs On-Premise SAP Systems	
Chapter 4: Supply Chain Business Processes in SAP	59-84
4.1 Procure-to-Pay (P2P) Process	
4.2 Order-to-Cash (O2C) Process	
4.3 Plan-to-Produce Cycle	
4.4 Warehouse and Logistics Management	
4.5 Demand Forecasting and Planning	
4.6 Inventory Lifecycle Management	
Chapter 5: Fundamentals of Performance Engineering	85-102
5.1 Performance vs Load vs Stress Testing	
5.2 Key Performance Metrics (Latency, Throughput, Response Time)	
5.3 SLA and SLO Definitions	
5.4 Bottleneck Identification Techniques	
5.5 Scalability and Capacity Planning	
Chapter 6: Testing Strategies for SAP Systems	103-119
6.1 Functional vs Non-Functional Testing	
6.2 SAP-Specific Testing Challenges	

6.3 Integration Testing in SAP Landscapes	
6.4 Regression Testing Strategies	
6.5 User Acceptance Testing (UAT)	
Chapter 7: Load and Performance Testing Tools	120-135
7.1 Overview of Testing Tools (JMeter, Load Runner, NeoLoad)	
7.2 SAP Test Acceleration and Optimization (TAO)	
7.3 Test Data Management Strategies	
7.4 Workload Modeling Techniques	
7.5 Scripting SAP Transactions	
Chapter 8: Monitoring and Observability in SAP	136-150
8.1 SAP Solution Manager Overview	
8.2 Application Performance Monitoring (APM)	
8.3 Logs and Trace Analysis	
8.4 Root Cause Analysis Techniques	
8.5 Real-Time Monitoring Dashboards	
Chapter 9: Performance Optimization Techniques	151-165
9.1 SAP HANA Database Optimization	
9.2 ABAP Code Performance Tuning	
9.3 Caching Strategies	
9.4 Parallel Processing Techniques	
9.5 Memory and CPU Optimization	
Chapter 10: Industry Case Studies (U.S. Focus)	166-179
10.1 Food Supply Chains and Cold Chain Logistics	
10.2 Retail Systems and High Transaction Volumes	
10.3 Financial Systems and High Reliability Requirements	
10.4 SAP in Fortune 500 Enterprises	
10.5 Real-World Failure Scenarios and Lessons Learned	
Chapter 11: DevOps, Automation, and Future Trends	180-196
11.1 DevOps in SAP Environments	
11.2 CI/CD Pipelines for SAP	
11.3 Test Automation Frameworks	
11.4 AI in Performance Testing	
11.5 Digital Twins in Supply Chains	
11.6 Blockchain Applications in Supply Chain
