

TABLE OF CONTENTS

Chapter 1: Foundations of the Intelligent Enterprise	01-23
1.1 Evolution from Traditional BI to AI-Powered Intelligence	
1.2 Core Technologies: AI, Machine Learning, and Data Analytics	
1.3 Architecture of Intelligent Enterprise Systems	
1.4 Data as a Strategic Asset: Governance and Quality	
1.5 Role of Cloud, Edge Computing, and Data Platforms	
Chapter 2: AI-Driven Decision-Making Frameworks	24-49
2.1 From Descriptive to Predictive and Prescriptive Analytics	
2.2 Decision Intelligence Systems and Augmented Analytics	
2.3 Real-Time Data Processing and Autonomous Decision Loops	
2.4 Human-AI Collaboration in Enterprise Decision-Making	
2.5 Ethical AI, Bias Mitigation, and Explainability	
Chapter 3: Transformation in the Financial Sector	50-68
3.1 AI in Risk Management and Fraud Detection	
3.2 Algorithmic Trading and Market Intelligence	
3.3 Personalized Banking and Customer Analytics	
3.4 Regulatory Compliance and AI Governance (RegTech)	
3.5 Digital Payments, FinTech Ecosystems, and Future Trends	
Chapter 4: AI in Healthcare Decision Intelligence	69-87
4.1 Clinical Decision Support Systems and Diagnostics	
4.2 Predictive Analytics in Patient Care and Outcomes	
4.3 AI in Hospital Operations and Resource Optimization	
4.4 Data Privacy, Security, and Healthcare Regulations (HIPAA)	
4.5 Telemedicine, Wearables, and AI-Driven Preventive Care	
Chapter 5: Industrial and Manufacturing Intelligence	88-106
5.1 Smart Manufacturing and Industry 4.0	
5.2 Predictive Maintenance and Asset Optimization	
5.3 Supply Chain Intelligence and Demand Forecasting	
5.4 Robotics, Automation, and Digital Twins	
5.5 Sustainable and Resilient Industrial Systems	

Chapter 6: Intelligent Enterprise Data Ecosystems	107-123
6.1 Data Integration Across Hybrid and Multi-Cloud Environments	
6.2 Data Lakes, Data Warehouses, and Lakehouse Architectures	
6.3 Metadata Management and Data Cataloging	
6.4 Data Security, Privacy, and Access Control Mechanisms	
6.5 Data Democratization and Self-Service Analytics	
Chapter 7: AI Strategy, Governance, and Organizational Transformation	124-142
7.1 Building an Enterprise AI Strategy and Roadmap	
7.2 Organizational Change Management and AI Adoption	
7.3 AI Governance Frameworks and Risk Management	
7.4 Talent, Skills, and the Future of Work in AI-Driven Enterprises	
7.5 Measuring ROI and Business Value of AI Initiatives	
Chapter 8: Future of Intelligent Enterprises and Emerging Technologies	143-162
8.1 Generative AI and Its Impact on Business Intelligence	
8.2 Integration of IoT, Blockchain, and AI in Enterprise Systems	
8.3 Autonomous Enterprises and Self-Optimizing Systems	
8.4 Hyperautomation and End-to-End Process Intelligence	
8.5 Trends, Challenges, and the Road Ahead for Intelligent Enterprises
